OBJECTIVE

Aspiring Data Scientist and AI Engineer with strong foundations in machine learning, NLP, and data analytics. Experienced in building and deploying end-to-end ML systems with a focus on scalability, performance, and real-world impact. Proficient in Python and modern ML frameworks with a track record of developing production-oriented solutions.

SKILLS

Programming: Python, C, SQL, HTML, CSS | Data: Pandas, NumPy, Data Analysis, Data Visualization
Machine Learning: Supervised & Unsupervised Learning, NLP, Feature Engineering, Model Evaluation
Frameworks: TensorFlow, PyTorch, Scikit-learn, Flask
Core: Data Structures & Algorithms, Model Optimization, Data Pipelines
Tools: Git, GitHub, Jupyter, VS Code

PROJECTS

AI Resume Analyzer: Built and deployed NLP-based ranking system using TF-IDF and cosine similarity; processed large-scale text data and achieved ~85% accuracy; developed real-time inference using Flask.

Face Recognition System: Engineered real-time face detection and recognition pipeline using deep learning; automated attendance tracking and significantly reduced manual effort.

DevAssist Web App: Designed full-stack Flask application with task management, alerts, and search; implemented structured JSON storage and deployed via cloud platform.

EXPERIENCE

Pinnacle (Aug 2023 – Sep 2023): Improved ML dataset quality through speech data annotation and preprocessing.

Shelters Go (Jan 2024 – Feb 2024): Performed data analysis using Python and Excel to generate actionable insights.

CERTIFICATIONS

Coursera: AI for Everyone | Introduction to Data Analytics | Data Visualization | Excel Basics
EXIN: Artificial Intelligence | Python | Blockchain

LEADERSHIP

President – Computer Society for Technocrats (2024–2025) | Head Coordinator – Hackathon, ACIC VGU (2024)
Convener – National Project Exhibition (2024)

EDUCATION

B.Tech – Computer Science (AI & Data Science), Vivekananda Global University | CGPA: 8.6
